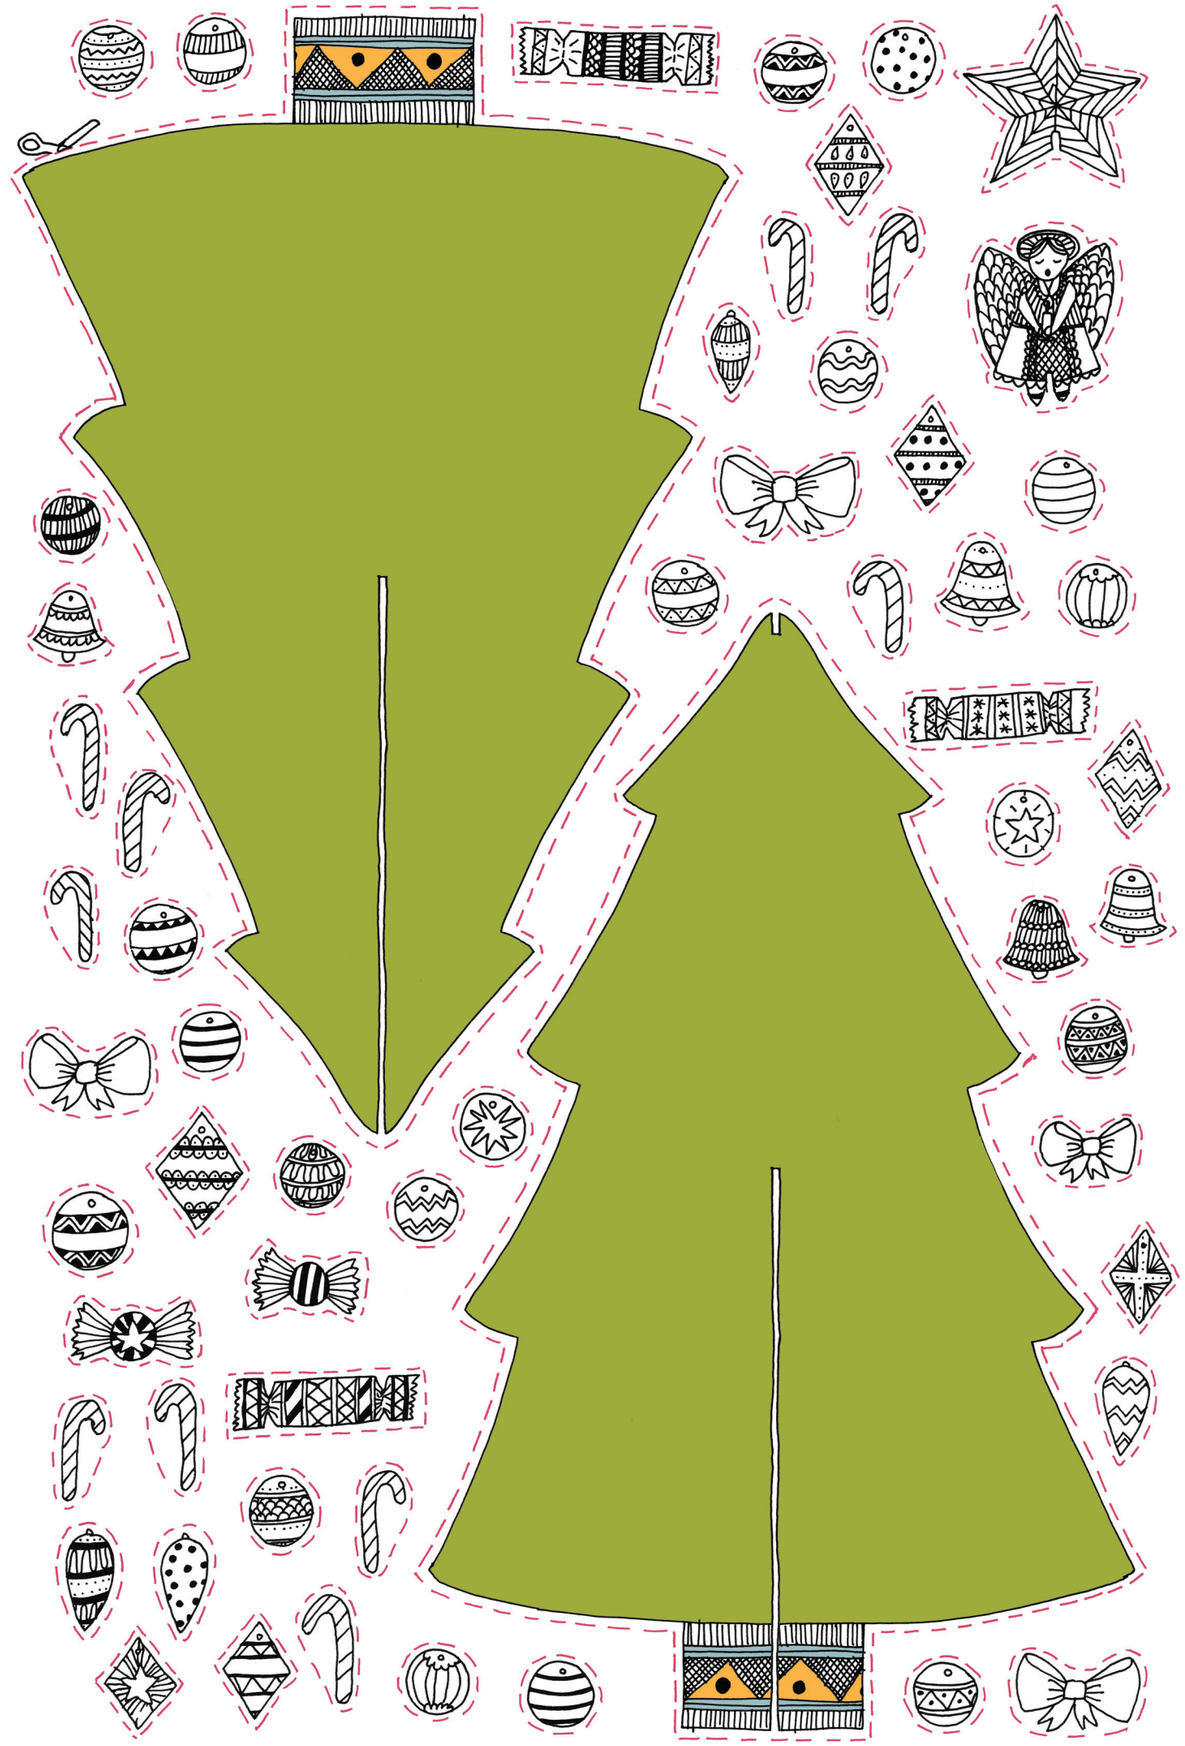
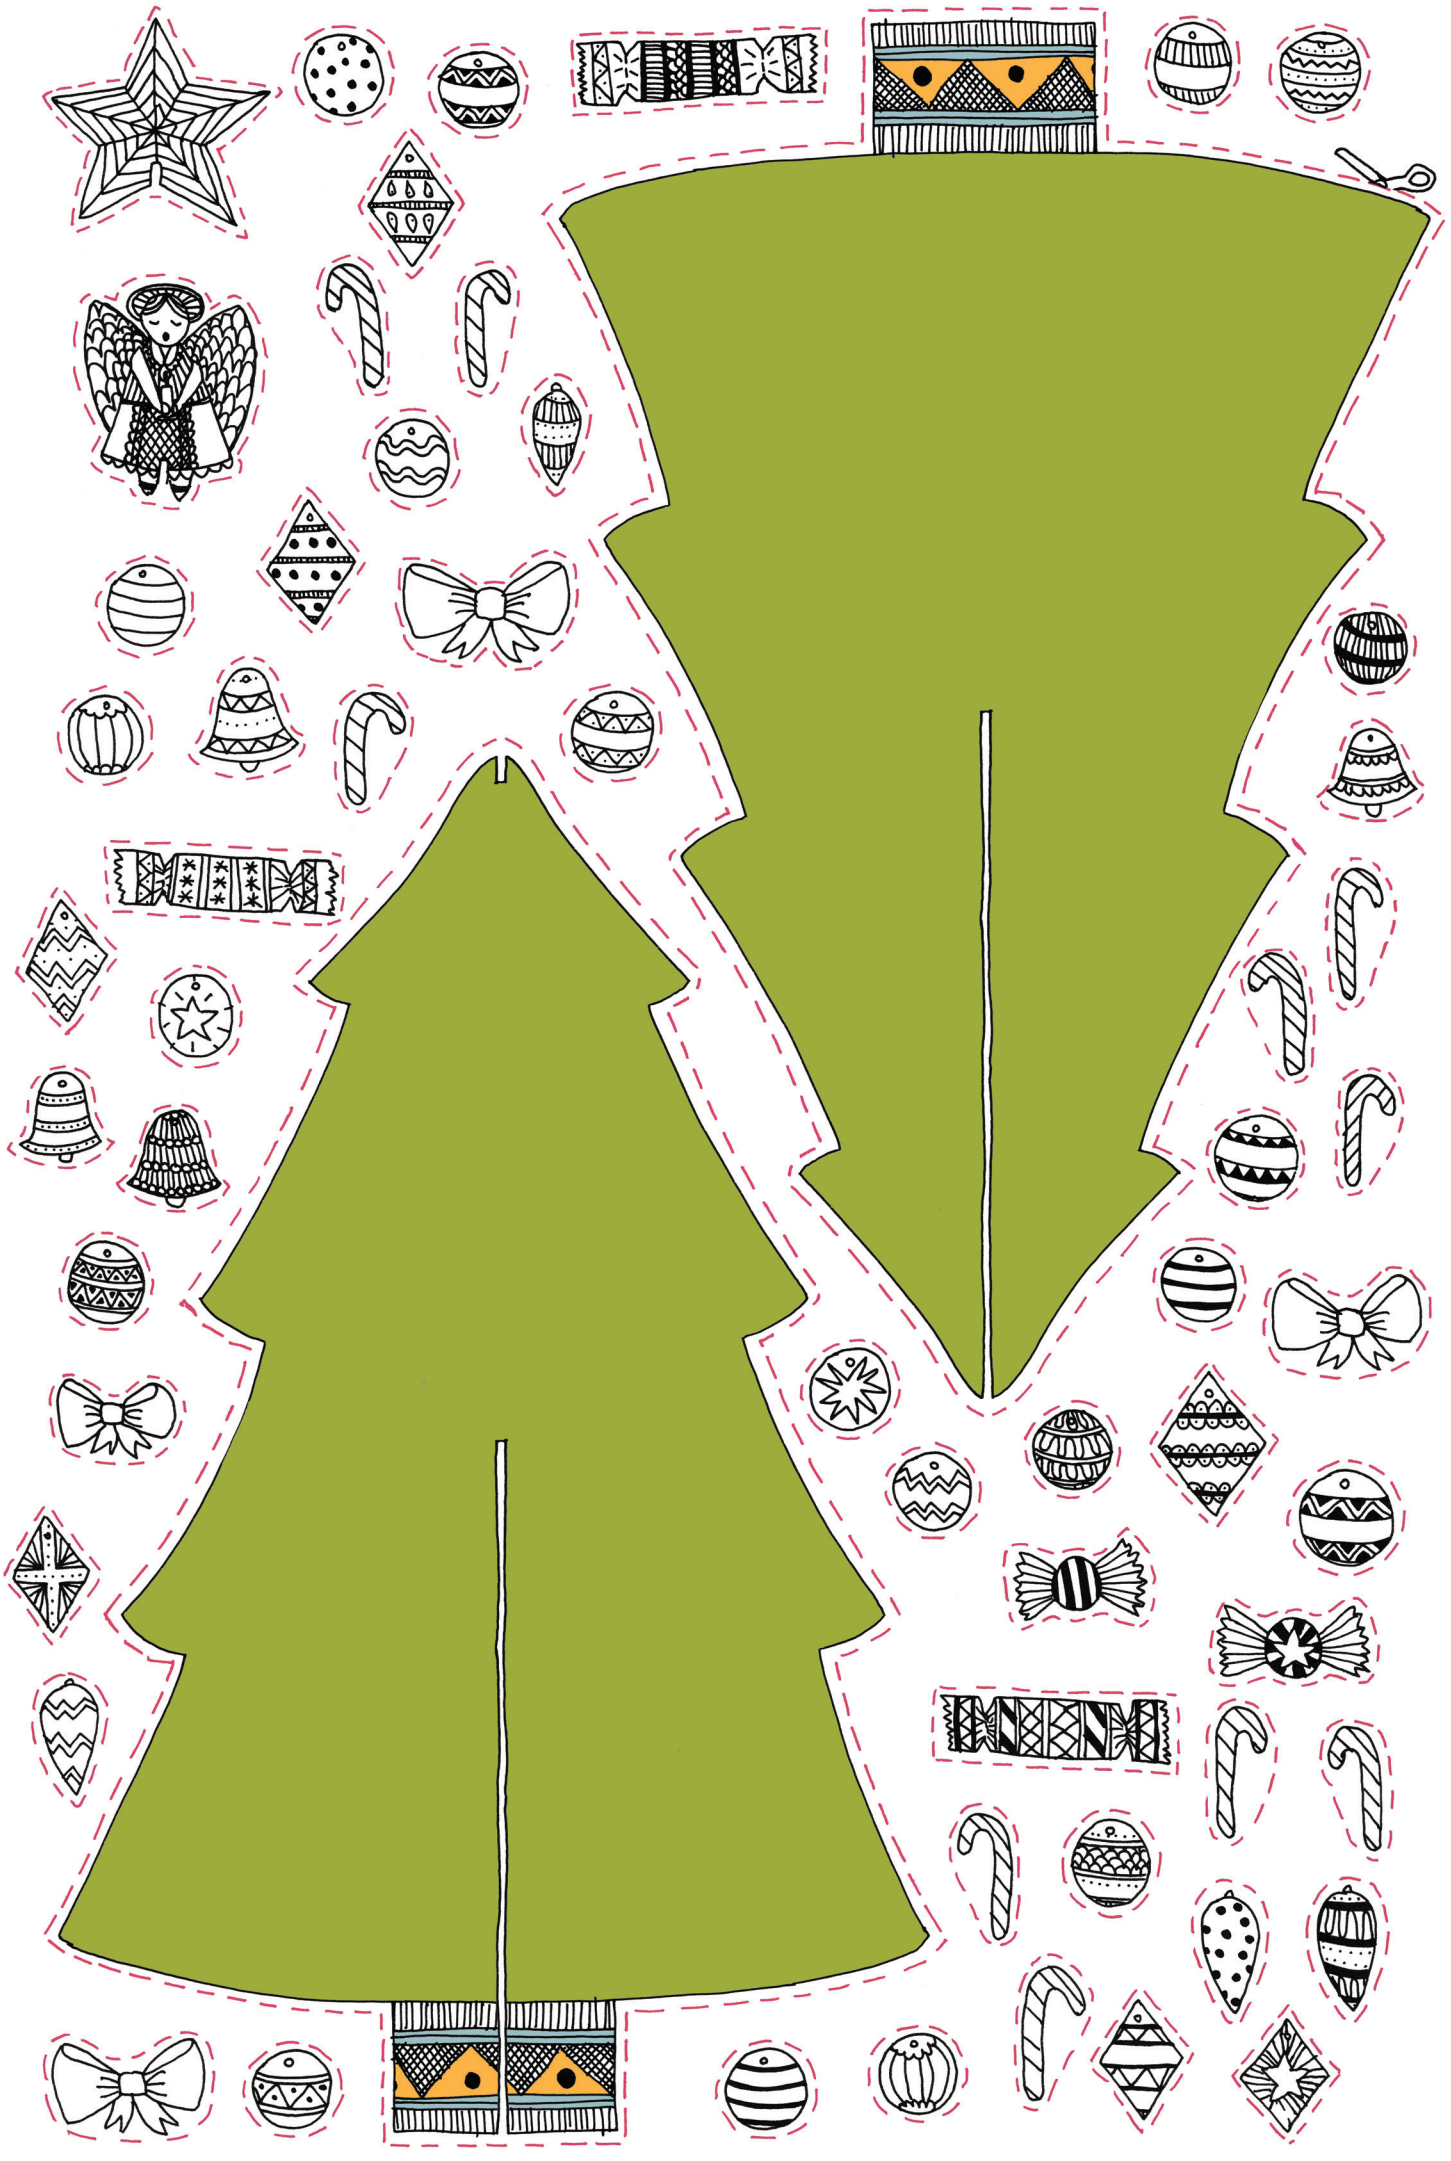
MAKE AND DECORATE YOUR VERY OWN PAPER CHRISTMAS TREE . . .

Colour in the decorations on the opposite page. Don't forget to colour in the reverse side too. If you like, you can add some glitter or something sparkly.

Carefully cut out the trees and decorations along the pink dashed lines.

Glue your coloured-in decorations onto all the sides of your trees.

Slot together the two decorated trees. (Sing or hum a festive tune while you do this bit!)




As a finishing touch, add either the star or the angel to the top of the tree that has the notch. Finally, stand it up and admire it.
